

The QUEENSLANDER PICTORIAL.

IN GALLIPOLI AND ELSEWHERE

General Information: The sand of Kona Landing is deep in the sea.

1. The first of these is the fact that the "National Security Council" is a body which is not subject to the same kind of public scrutiny as the Executive branch of the Government. It is a body which is not subject to the same kind of public scrutiny as the Executive branch of the Government. It is a body which is not subject to the same kind of public scrutiny as the Executive branch of the Government.

Approved by the International Civil Service Commission on 15 November 1966, the Commission's report was submitted to the General Assembly of the United Nations on 16 November 1966. The Commission's report was also submitted to the Secretary-General of the United Nations on 16 November 1966. The Commission's report was also submitted to the Secretary-General of the United Nations on 16 November 1966.

10. *Chlorophyll a* and *Chlorophyll b* were determined using a spectrophotometer (Shimadzu UV-1601) at 663 nm and 646 nm, respectively. The concentrations were calculated using the following equations: $\text{Chlorophyll } a = 11.85 \times \text{OD}_{663} - 1.54 \times \text{OD}_{646}$ and $\text{Chlorophyll } b = 22.9 \times \text{OD}_{646} - 4.68 \times \text{OD}_{663}$ (Arar and Parsons 1992).
